

Jewels of the Russian Arctic

Franz Josef Land and Novaya Zemlya

Polar bears, whales, walruses and thousands of seabird colonies. We invite to join our cruise following the footsteps of early northern explorers to two of the most remote archipelagos on the planet: from the ancient mountains of Novaya Zemlya to the wildlife sanctuary of Franz Josef Land. It starts in Murmansk and goes through the most picturesque corners of the Russian Arctic national Park.

Experiences you'll have

Journey to Novaya Zemlya and Franz Josef Land

During this cruise you will reach two archipelagos at once: the well-known Franz Josef Land, as well as the hard-to-reach Novaya Zemlya. Due to the location of military bases, it is impossible to get here without obtaining special permits, but on this trip we took care of all organizational issues.

Early-bird promotion: now the prices for the cruise in 2023 is cheaper, than in 2022. Check details in "Accommodation" block

Traveling along this route you will see:

- historical sites associated with the great Arctic explorers Fridtjof Nansen and Hjalmar Johansen
- the harsh Arctic landscape: flowering tundra, the huge icebergs and the whole island covered with ice
- polar bears walking slowly on ice floes
- a huge walruses rookeries
- whales emerging from the ocean depths
- and noisy seabirds colonies

Itinerary

The journey begins in Murmansk, where you should travel to on your own. We are ready to help with the purchase of air tickets, if necessary, leave a comment in the application.

Here is the general plan of the expedition, the route may change depending on the weather and ice conditions.

Day 1

After arriving in Murmansk, in the afternoon you will board

an expedition ship and go to the Barents sea.

Day 2

As you sail through the Barents Sea, your expedition team

will prepare you for the adventures that await. Learn about the storied history and politics of the region, its fascinating wildlife, geology, ecology and climate, and the incredible sights you will soon explore.

Staff will keep a lookout for seabirds, such as kittiwakes,

skuas and fulmars soaring above your ship. Whale and seal sightings may also be possible in this biologically diverse sea.

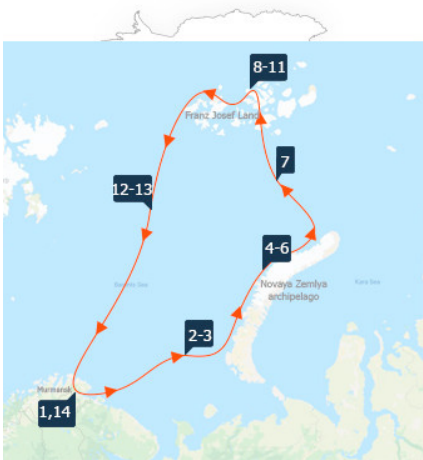

Day 3

The largest of the Eurasian arctic archipelagoes, the rarely

visited Novaya Zemlya ("New Land") is the third-largest wilderness area in Europe. This seemingly long, narrow island actually consists of two main islands, Severny (northern) and Yuzhny (southern), separated by the imposing Matochkin Strait.

As we explore Novaya Zemlya, expect a new adventure

every day. Each expedition will be unique, depending on the weather and ice, but a few landing sites we strive to visit include Inostrantseva Bay, the Oransky Islands, Cape Zhelaniya, Cape Spory Navalok and Russkaya Gavan.

Boasting one of the most picturesque glaciers in the entire

archipelago, Inostrantseva Bay provides breathtaking panoramic views of pristine arctic wilderness. If conditions allow, we may explore ashore, or Zodiac cruise along the face of the glacier, at a safe distance, possibly witnessing the wonders of calving ice. Encounters with Brünnich's guillemots (thick-billed murre) are likely, owing to a small colony in the coastal cliffs.

To the northwest side of Severny Island are the Oransky

Islands. Wildlife abounds here, with a variety of animal and plant life to be discovered, Walrus have been sighted here on many previous expeditions. Coming across a walrus haul-out is unforgettable. These giant pinnipeds of the Arctic create a raucous as each walrus vies for a choice spot of coastline. Encounters with whales and seabirds are possible, as well as polar bears, a genetically distinct subpopulation here.

A significant site in polar exploration, Novaya Zemlya also

offers a number of opportunities for you to trace the footsteps of famous explorers and reflect on the region's history.

Day 4

Bid farewell to Novaya Zemlya as we cruise farther north

to Franz Josef Land. There are several activities to keep you engaged while at sea. Attend presentations by your expedition team, relax in our polar library or simply spend some time on deck, admiring the sea.

Day 5

Franz Josef land is the most remote and Northern of the

archipelagos of Eurasia, located beyond the Arctic circle. It consists of 191 Islands, most of which are covered with ice. The archipelago is a nature reserve and part of the Russian Arctic National Park.

Weather and ice conditions will shape our exploration, but

we do hope to explore historical sites, remote seabird colonies and walrus haul-out at some notable destinations, such as Cape Flora, Cape Norway, Bell Island and Tikhaya Bukta. Polar bear encounters are also possible.

On Jackson Island, Cape Norway is where Norwegian

explorers Fridtjof Nansen and Hjalmar Johansen wintered from 1895 to 1896. The conditions were astonishingly difficult, but they survived until the summer and continued their journey south. The remains of their small hut are still here today, along with a memorial marking the event.

Exploring Tikhaya Bukta (Calm Bay), the site of an

abandoned weather station on Hooker Island, will feel like stepping back in time. There is plenty to discover as you wander the ruins, immersed in Russian polar history, and you may even be able to send a postcard from the post office!

If the weather is good, you will explore the Stolichky and

Appolonov Island by Zodiac boats to watch at close range the walrus that have founded huge rookeries here.

Day 6

As your arctic expedition winds down you have a couple of

days to sail through this wildlife-rich sea, where whales of various

species are often seen. Take in a presentation, reminisce about your incredible journey with your shipmates, relax in the lounge while swapping stories and photos or enjoy the solitude of the sea. Expedition staff will be on hand to answer any remaining questions and spot wildlife.

Day 7

In the morning you will have breakfast, say goodbye to the

ship's crew and disembark. Then there will be a group transfer to the airport.
